## Recent Projects

---

Employee Time Management System

- Developed a cross-platform employee time management system using JavaScript, React, React Native, MongoDB, and RESTful APIs.
- Implemented features such as time tracking, timesheets, and time-off requests for employees, with administrative controls.
- Utilized Material UI for a modern and intuitive user interface.

NFT Project - 10,000 Uniquely Generated Characters

- Created an NFT platform with 10,000 algorithmically generated characters using JavaScript, React, and Solidity.
- Integrated with the Ethereum blockchain for character trading and ownership verification.
- Ensured responsive and engaging UI design using CSS (RWD).
